

DAILY HI-MATIC: THE NEXT GENERATION GEARBOX

INDUSTRY FIRST 8 SPEED AUTOMATIC GEARBOX

The new ZF 8 speed automatic gearbox is designed to provide unrivaled performance and comfort: with the ergonomic multifunctional shift lever you are fully focused on traffic and driving conditions. With the choice of either sequential or full automatic mode, the HI-MATIC offers complete control to the driver.

OUTSTANDING FUEL ECONOMY THANKS TO A CHOICE OF ECO OR POWER MODES

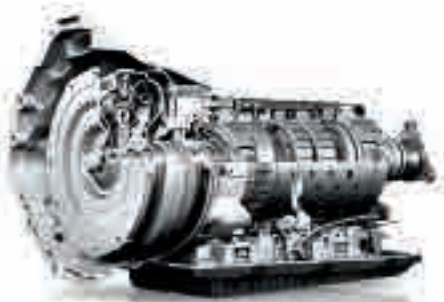

Whether it be responsive power you require or reduced fuel economy, you can have both with the new HI-MATIC. With the simple push of the shift lever to ECO or PWR modes, the HI-MATIC transmission delivers what you require. With a self-adaptive shift strategy, the HI-MATIC transmission engages smoothly the correct gear in less than 200 milliseconds. With the widest ratio spread, the engine will always be at the optimal speed.

10% LOWER MAINTENANCE AND REPAIR COSTS THANKS TO RECORD RELIABILITY AND DURABILITY

Designed with durability in mind, the New Daily design solutions protect the engine and transmission to ensure less maintenance. Our engineers have ensured that the legendary durability of the Daily is continued.

BEST IN CLASS PERFORMANCE, HIGHEST POWER (205HP) AND TORQUE (470NM)

With class leading power (205hp), torque (470Nm) and payload capacity (4500kg), and now with the HI-MATIC transmission, the New Daily is the best vehicle in its class.
